Obscuration gone

Details:

Most magical items do not have any obscuring magic on them.

The items that do have obscuring magic have one of two types,
- first is the 'Obscure Magic Aura' which makes all Detect Magic spells show the item as low magic.
- second is the 'Obscure Magical Depth' which makes all Detect Magic spells show only 3 aspects.

This spell removes both issues when cast. Even if both issues are present.

Therefore, the casters of Detect Magic can be fooled by the Obscuring.
But if that obscuring is suspected a caster can then use this spell to reveal the truth.
